

ME TO YOU  
SAMEN STERK

## ME TO YOU

Dominiek Mazure is a junior member of staff at the Ghent University Hospital, and consultant in Haematology at AZ Damiaan Hospital in Ostend. She practices every aspect of clinical haematology with a particular interest in haematopoietic stem cell transplantation.

My motivation to join the advisory committee of the ME TO YOU foundation is based on the room for improvement in the treatment of leukaemia and other haematological malignancies, and the need for innovative research to achieve this improvement.
